

NEWS RELEASE

Bay Systems Inc. Selected as Technology Supplier for ARIA

Victoria, British Columbia (May 1st, 2007) – Bay Systems Inc. is pleased to announce that it has been selected as technology provider for ARIA, Victoria's most prestigious new downtown residence. ARIA will be home to 174 luxury suites rising amidst the shadows of the historic Empress Hotel and Crystal Gardens.

“We are very impressed with the level of technology Bay Systems Inc. brings to our development”, says Fred Rohani of Alpha Project Developments who is building ARIA. “Whether clients wish to have wall mounted televisions, in-wall music systems or lighting control, technology for us is really about extending comfort and convenience to our clients”.

“We are pleased to welcome ARIA to our growing family of local condominium developments”, says Bay Systems Inc. president John Vickers. “We find many purchasers appreciate the opportunity of having their homes pre-wired during the construction phase for a whole host of technology options and then have our highly skilled technical team install their selected products upon move-in.”

For more information regarding the ARIA development visit the presentation centre located at 920 Douglas Street (at Broughton) open Wednesday through Sunday's from 1 – 4 pm or visit www.ariavictoria.com.

Bay Systems Inc. is a Victoria based custom technology firm specializing in a wide range of products from a variety of industry including high speed wiring, high definition home theatre, distributed audio systems, lighting control systems, communications systems and 24-hour electronic security.
